EB1218	Fire Blanket 1.2 x 1.8m	£22.38

Redlam Panic Bolt

Manufactured from cast aluminium.

Supplied c/w 1 ceramic tube, hammer, chain & fixings.

Code	Description	Price
RPB1	Redlam Panic Bolt	£39.86
TCR1	Ceramic Tube	£2.83
TGL1	Glass Tube	£1.10

Door Alarms

Exitguard 100 Series - The ideal solution for security of fire exit doors and satisfies the dual requirements of both Fire and Security officers. The integral sounder has two selectable tones to enable the alarm condition to be distinguished from any other alarms in the vicinity. The alarm can be silenced and reset using the keyswitch or the Exitguard can re-arm automatically after a preset delay once the door has been closed.

EX104 is battery powered for use where a separate supply of power is not available and the protected door is opened infrequently.

EX106 is a mains powered version of the EX105 and features all the same functionality. Six AA batteries are included to provide power in the event of mains failure.

Life Hammer

Effective emergency escape tool, shatters Auto glass windows and cuts through seatbelts. TUV Approved. Tough pointed double hammerhead combined with sharp protected blade. Supplied with fixing bracket incorporating photoluminescent button.

Code	Dimensions	Price
LifeH1	L175 x W68mm	£9.99

Code	Description	RRP
EX104	Battery powered EXITGUARD	£79.07
EX106	Mains powered EXITGUARD with alarm output relay	£93.93

EXITGUARDS EX104 & EX106 are supplied with batteries. all models are supplied with a door warning label, door contact and fixing screws etc.....

Installation service available upon request

Call Point Protection

STOPPER is a protective cover to help prevent malicious or accidental false alarms, without restricting legitimate operation of devices such as fire alarm call points. The STOPPER is ideal for schools, colleges, hospitals, nursing homes, hotels and all public buildings where there is a history or threat of false fire alarms.

Code	Description - Both supplied with 30mm spacers	Price
STI6531	Surface mount STOPPER, no alarm	£36.00
STI6533	Surface mount STOPPER, c/w battery powered integral alarm	£81.00

When ordering please add suffix to indicate colour required R-Red, G-Green, Y-Yellow, B-Blue.

Dorgard - Fire Door Retainer

The simple, reliable acoustic device that holds a fire door open in any position and then automatically releases the door should a fire alarm sound.

- Battery Powered
- Wire Free
- Tough ABS Case
- Battery Life 12 Months plus
- Fail Safe Operation
- Simple to Install less than 5mins
- Complies with relevant Standards

Order by adding colour after code

Code	Description	Price
1328-A01	Dorgard	£127.53

Fire Alarm

The GX20e is the simplest and most economic form of electrical fire alarm available. It features an integral call point and a high power (105db @ 1metre) piezo electronic sounder. A keyswitch is used to silence or restart the alarm.

The GX20e is a manual fire alarm for small buildings where a single standalone alarm is sufficient. However, up to 4 units can be linked with 2 core cable to form a system in which if any one call point is operated then all sounders will be activated. A cable monitor is included. It is powered by two Pp3 Alkaline batteries (supplied) that have a life expectancy of about 12 months depending upon usage. A battery condition monitor is incorporated to warn of impending battery failure.

Installation service available upon request

Code	Description	Price
GX20e	Gemini Battery Powered Fire Alarm	£104.55
PS210	Resettable Element - single	£1.34
KACK/5	Call point test key (10Pk)	£10.93

Deafgard - Will all your guests hear the fire alarm?

Under the mandatory terms of the Disability Discrimination Act effective 1st October 2004, all hoteliers are legally obliged to make provision for the needs of the deaf and hard of hearing. Using the latest technology, Deafgard is the safe, reliable and portable choice to communicate the sounding of a fire alarm.

Place the pad under the pillow if the fire alarm sounds the Deafgard hears the alarm which causes the pad to vibrate, alerting sleeping guest to FIRE.

Where sleeping people are to be woken then 75db is required at the bedhead. Deafgard hears db's from 60-90 (Most fire alarms sound at 62db)

Dimensions mm (H)115 x(W)165 x(D)125

Code	Description	Price
DEAFGARD A101	Deafgard fire alarm for the deaf	£199.00

Aidalarm

The AIDALARM meets the requirements for emergency signalling systems for disabled persons and is fully compliant with BS8300 and the requirements of the Disability Discrimination Act.

Operation - Pulling the cord or pressing the CALL button generates an immediate alarm condition at the AIDALARM. Visual indication is given by flashing high brightness LEDs. An acknowledge LED is also illuminated on the pull cord or call button. A SILENCE/RESET button is included on the front panel. Facilities are available for separate silencing and resetting, if necessary from remote locations.

Code	Description	Price
A600BKITR	Surface mount battery powered AIDALARM c/w S1600 & S1608P	£86.80

Keyguard

The Keyguard is not your average key box it has been designed with safety as well as security in mind. The Keyguard is able to take both **KEYS** and **CARDS** and is available with or without alarm facilities, either battery powered alarm or simply as a single pole micro switch making it suitable for many applications. The window is designed in such a way that it cannot be refitted after removal. The Keyguard plastic window enables it to be used in such areas as schools, food preparation areas and swimming pools. There are no shards of glass or sharp edges that could cause injury.

Code	Description	Price
K1000	Standard KEYGUARD	£11.03
K1010	KEYGUARD with integral battery alarm	£23.88
K1020	KEYGUARD with contacts for a remote alarm	£15.09

400 x 120	£13.93

Escape route sign systems should provide clear instruction for the means of escape, allowing people to escape without assistance under stress situations. To be effective all ambiguity must be avoided. Clear directions from any point in the building should be given, to achieve this it is vital that there is total consistency in the signage until a place of safety is reached.
